This parcel contains _____ (total quantity) glass histopathology slides. These tissues were sliced to no more than 1 centimeter (cm) thick and immersed in a 10% formalin solution equivalent to at least 10 times the tissue volume. The formalin was changed at weekly intervals over a period of at least 2 weeks before beginning preparation of the histopathology slides. These tissues were then paraffin embedded, cut to 5 micrometers (um), and attached to 1 x 3-inch glass histoslides.
